

# CONTOUR INTERIOR

### Applications

Desk lighting, exposed areas, surface mounted features.

### Description

Surface mounted cold cathode has been around for decades and is very popular for exterior outline detailing on buildings and signage. Installation of such systems has however, always been considered tricky and complicated, especially as a fireman's switch is required. The use of low voltage cold cathode for similar applications removes the requirement of a fireman's switch and allows it to be used internally and at low levels.

The control gear can be mounted either adjacent to, or remote from the lamps, depending on application, with dimming options also available.

### Gear Mounting Position

Adjacent or remote (see relevant specification sheet)

### Benefits

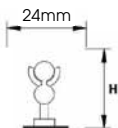

Interior lighting of buildings such as cinemas, petrol stations, leisure developments and shopping centres.

### Features

- Continuous linear light source using turned back electrodes
- Low voltage operation
- Curved or straight to any contour
- Different tube diameters
- Over 50 colours available
- No fireman's switch required.

### Technical Data

Please note that all dimensions are subject to a tolerance of +/- 2mm

D - 20mm

H - Up to 50mm
